

Te`UZYI Telescopic Steel Covers

- Individual
- Professional
- Highly precise

Robust Protection for your Guideways

Innovative Solutions Ensure Maximum Precision

Steel Covers consist of steel or stainless-steel boxes which slide telescopically one into the other and provide optimum protection from chips, dirt, oil and coolants.

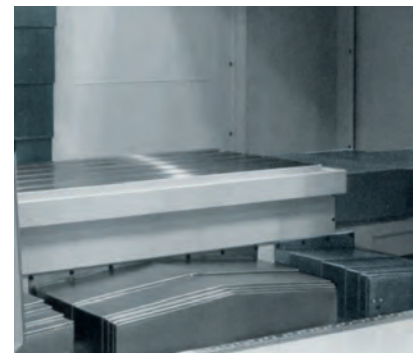

TelaZYI Steel covers are engineered and designed with the utmost precision, in a wide range of shapes and designs, to your specifications.

For your safety you will receive drawings for checking and approval before we start production.

TelaGuard Steel Covers are made with state-of-the-art precision from high-grade steel plates. HALLTECH specialties are stainless-steel covers as well as covers for dry machining.

Telaflex - Highlights:

- Special sliding, roller and damping systems
- Low-noise wipers
- Dry-working wipers
- FPM (Viton®) wipers
